Re NCPDP Prescriber ID Task Group Recommendations for Medicare Individual provider Enrllment File Layout

NCPDP Prescriber TG Medicare Enrollm	20160818 WG1 Prescriber TG_CMS N

Good Morning,
One of the takeaways from the 8/18/2016 meeting between CMS and the NCPDP Prescriber Task group, was for NCPDP to provide detailed examples of the proposed file layout and associated claims processing scenarios. This requests has been accommodated within the attached document. Please note, this is very similar to the document submitted on March 30, 2016. Minor changes were made to clearly define the requested new attributes and claim processing rules. The file layout section portrays what the Medicare Individual Provider Enrollment file would look like based on each Post date and the second table depicts how this information would be integrated into a PBM claims processing system.

The status of historical records post any changes to the file layout is still under review by the Task Group. Please refer to the 'Concerns with Historical Records" section of this document for an overview of the specific use cases. This is the primary agenda item for today's task group call.

To all CMS and CPI representatives,

Thank you for supporting today's webinar for the NCPDP Prescriber Task Group to review initial findings with the test enrollment file changes and discuss other related concerns to the Medicare Part D prescriber enrollment requirement. We look forward to working with you in ensuring a smooth implementation.

The attached document includes the notes from today's discussion. Examples were also added to item #4, identifying NPIs inactive in NPPES but active in the production enrollment file.

The 08/22/2016 task group meeting will be dedicated to composing data file examples and claim scenarios that align to the file layout and claim adjudication recommendations. The task group will also confirm whether the 'Update Date" is necessary, and if so how it should be defined. This detail will be provided to Lisa and Sita early next week.

Thank you
Sharon
