#### Old Business:

- Received updates on:
  - SNIP
  - DSMO Change Request System (CRS) Requests No. 1201 and 1202.

#### Task Groups:

- The **Education/Legislation and Regulations Task Group** reviewed the Medicare Program; Contract Year 2019 Policy and Technical Changes to the Medicare Advantage, Medicare Cost Plan, Medicare Fee-for-Service, the Medicare Prescription Drug Benefit Programs, and the PACE Program Final Rule. Task groups in WG9 and WG11 were assigned the task of determining if comments were needed and submitting any comments.
- The **Real Time Prescription Benefit Standard Task Group** completed the review of the alignment of use cases to the EDI format transaction layout. The task group has been discussing reject/denial codes and messaging for the new standard.
- The **API Task Group** decided a complete re-write of the *NCPDP Connectivity Operating Rules* was necessary. Work on creating the new connectivity document has begun.
- The **Emergency Preparedness Task Group** completed the NCPDP Emergency Preparedness Information v1.5 and presented it for Work Group approval. The Work Group approved the latest version. The task group has started its next project of outlining stakeholder requirements for distributing/billing flu vaccine from stockpiles in the event of a flu pandemic.
- The **X12 TR3 Comment Consolidation Task Group** did not meet this quarter.
- The **ECL Task Group** submitted DERF 001611/ECL 000265 which modifies the definition for ECL value 1H for Result of Service Code (441-E6) and ServiceResultCode and DERF 001612 which expands the description for some of the ECL values of “other”. The Work Group approved both DERFs. The task group has been discussing a proposal to create reject code categories for Telecom reject code values as an enhancement to the web-enabled ECL.
- The **Specialty Task Group** receives regular updates from task groups with activity which either specifically targets specialty workflows or work that may impact/benefit specialty stakeholders. The task group reviews website activity and monitors industry educational activity as identified/reported by TG members.

- The **Gender Transition Task Group** reviewed claims to identify edits related to gender mismatch and determine how pharmacies are reconciling claims denied with gender related reject codes. The task group decided to withdraw DERF 001576/ECL 000252 which proposed a new Submission Clarification Code to allow Pharmacies to override gender rejects when the pharmacy determines the reject is invalid for patients transitioning genders. The task group will work on developing guidance on the usage of reject codes and resolution of rejected pharmacy claims related to gender transition.
- The **Patient Identification Task Group** submitted DERF 001609/ECL000264 which creates a new ECL value for Patient ID Qualifier (331-CX) and DERF 001610 which requests changes to the Telecommunication Standard to support the communication of universal patient identifiers (UPIs). The Work Group pended both DERFs. The task group began to identify the changes needed to the SCRIPT Standard to support the communication of UPIs within that Standard.
